For the attention of Mr Mark Kempson

25 March 2021

Dear Mark

**RE : SURFACE WATER DRAINAGE STRATEGY REPORT – TOPSHAM CARE HOME**

I am writing to you with reference to drainage strategy report 20020-ARC-XX-00-D-0001-P1, which was prepared for in August 2020 to support the planning application to build a 72 bed care home on this site.

We understand that this application is now been revised for a proposed 86 bed care home, with additional accommodation being provided to the second floor area. As the overall site, building footprint and impermeable areas will not be changed from the previous scheme, we confirm that the surface water drainage strategy report already submitted is remains valid for the new scheme.

Please do not hesitate to contact us should you require any further information.

Yours sincerely

Andrew Rimmington  
Managing Director
