Subject: FW: Planning Application 19/1676

Having objected to the previous plans I am pleased to see that the proposal for buff brick has been replaced with red brick, more in keeping with the rest of the street.

I would argue however that the size of the development is still completely disproportionate to building in the rest of the street. while there are developments at both ends of Willey's Avenue, neither are within easy sight of this development which therefore makes the 'in keeping with streetscape' not accurate.

Parking continues to be a concern with only one space per apartment.

I once again object to this development due to its sheer size and mass. This will take significant light from my property. I would argue that a smaller development would still be more appropriate.

Please could you confirm receipt of this objection.

Thank you

Jacqui Cornish
