Chris

Many thanks for notifying us of updates to the drawings for this application.

We welcome the provisions made for people cycling, particularly the access across the site and the entrances to the site. The provision of cycle parking for a range of cycle designs and the bike maintenance facilities.

There is a positive reference in the Design and Access statement to adding "hoops for securing cycles" being "strategically placed in other areas of the park". This is to be welcomed.

We have three comments:

1. Can we please ensure the design of these "hoops" are proper Sheffield stands that align with the LTN 1/20 standards.
2. Can we also ensure the precise number of cycle parking is specified before consent is given?
3. The number of cycle parking spaces in the bike shelter feels too little for the park where demand for cycle parking will be very 'peaky'.

We hope these comments can be considered and factored into the conditions for granting consent to this application.

Thank you

Mike
