1.0 Outline of BREEAM Process

1.1 Introduction

This report has been produced to detail the method adopted in demonstrating that the aspects focused within a BREEAM Assessment are considered and incorporated into the design of the proposed new build student accommodation block situated at Gladstone Road, Exeter.

For the layout and facilities included within the student accommodation block, the appropriate scheme type is under 'Multi-Residential' and will extend to reflect the performance of the buildings up to be fully fitted out at completion.

1.2 BREEAM Rating

In line with the planning policy requirement (Core Strategy Policy CP15), the scheme is designed to obtain a 'Excellent' rating under the current BREEAM 2018 New Construction guidance. This rating level relates to a score of 70% (and above) when referring to the below rating table taken from the guidance.

BREEAM Rating	% Score
Outstanding	≥ 85
Excellent	≥ 70
Very Good	≥ 55
Good	≥ 45
Pass	≥ 30
Unclassified	< 30

1.3 Minimum Standards

Alongside achieving the above percentage level, a number of minimum standards / mandatory credit criteria exist as part of obtaining this rating level. These are outlined below and are incorporated into the targeted credits which are committed to via this report:

BREEAM Issue	Mandatory Criteria 'Excellent'		
Man03 – Responsible Construction Practices	One credit (Responsible Construction Management)		
Man04 – Commissioning & Handover	One credit (Test Schedule and Responsibilities)		
Man04 – Commissioning & Handover	Criterion 11 (Building User Guide)		
Man05 – Aftercare	One Credit (Commissioning Implementation)		
Ene01 – Reduction of Energy Use and Carbon Emissions	Four Credits (Energy Performance or Operational Energy Consumption)		
Ene02 – Energy Monitoring	One credit (First Sub-Metering Credit)		

Wat01 – Water Consumption	One credit (Minimum of 12.5% Water Saving)
Wat02 – Water Monitoring	Criterion 1 only (Water Meter on Mains Supply)
Mat03 – Responsible Sourcing of Construction Products	Criterion 1 only (Legally Harvested & Sustainable Timber)
Wst03 – Operational Waste	One Credit

1.4 Section Weighting

A BREEAM Assessment is conducted over nine separate sections (plus an Innovation section) and each of these sections are weighted as a percentage of the overall 100% available in any one assessment. The weighting levels for a BREEAM New Construction scheme are highlighted below:

BREEAM Section	% Weighting			
Management	11			
Health & Wellbeing	14			
Energy	16 10			
Transport				
Water	7			
Materials	15			
Waste	6			
Land Use & Ecology	13			
Pollution	8			
Total	100			
Innovation (additional)	10			

2.0 BREEAM Pre-Assessment Exercise

2.1 Introduction

As part of establishing a target score which meets the verifiable rating at the Pre-Assessment stage, questions regarding the category use type and intended design are answered to filter in and out the appropriate credit titles and sections. The applicable credits and their requirements are then considered against the scheme design criteria. This process is fundamental to the success of a BREEAM assessment.

2.2 Pre-Assessment Summary

The summary review exercise is provided to demonstrate this process having been undertaken to highlight credits available, where mandatory criteria is outlined and of the available credits which are targeted within this assessment. The following title headings shown within the Pre-Assessment are outlined as follows:

Available Credits Targeted Credits Summary of Credit Involvement Management IIII Project Delivery Planning IIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIII	
Management BFE Mank VS Owner RBA Summary Comment Man 0 Project DeliveryPlanning 1 - 1 Client / PM 2 Confirmation of utile sustainability and consultation process and appointed parties selected to deliver as set-out by project develops to end third-party stakeholder engagement on the refurthshment project BREEAM AP (Concept Design) 1 - 1 BREEAM AP 2 Confirmation of utile sustainability and consultation process and appointed parties selected to deliver as set-out by project develops to end third-party stakeholder engagement on the refurthshment project BREEAM AP (Developed Design) 1 - 1 BREEAM AP 2 Appointment of a BREEAM Advisory Professional with involvement through the project design stages Breepental Life Cycle Costing 2 - 0 LCC Analyst 2.4 Not targeted (Component LCC exercise not to be conducted at RIBA Stage 2) Component Level Life Cycle Costing 1 - 0 LCC Analyst 2.4 Not targeted (Component LCC exercise not to be conducted at RIBA Stage 2) Component Level Life Cycle Costing 1 - 1 PM -> Contractor 4.6 Capalat Cost to be reported 1

2.3 Initial Rating

On completion of this exercise, the target score has been set at **71.48%**. Accounting for all mandatory credits being completed and the score exceeding 70%, a suitable method is demonstrated for obtaining an 'Excellent' BREEAM rating in line with the project requirements. The full Pre-Assessment summary is shown on the following pages for context.

Initial details

Technical manual issue number : Issue 2.0 Project scope : Fully fitted Building type (main description) : Residential institution (long term stay) Sub-group : Residential college or school (halls of residence) Assessment stage : Design (interim) Building floor area (GIA) : 4800 m² Building floor area (NIFA) : 4500 m² Is the building designed to be untreated? : No Building services - heating system type : Other type of heating system Building services - cooling system type : Air-conditioning Are commercial or industrial-sized refrigeration and storage systems specified? : No Are building user lifts present? : Yes Are building user escalators or moving walks present? : No Are there any water demands present other than those assessed in Wat 01? : No Does the building have external areas within the boundary of the assessed development? : Yes Are there statutory requirements, or other issues outside of the control of the project, that impact the ability to provide outdoor space : No

Are there any systems specified that contribute to the unregulated energy load? : Yes

Are the Post-occupancy stage credits targeted in Ene 01 issue? : Yes

Laboratories

Are laboratories present? : No

Are there fume cupboard(s) and/or other containment devices present? : No

Man 01 Project Brief and design

To optimise final building design through recognising and encouraging an integrated design process and robust stakeholder engagement.

Site : Gladstone Road

ASSESSMENT CRITERIA		
Project delivery planning :	Yes	
Stakeholder consultation (interested parties) :	Yes	
Prerequisite: Have the client and the contractor formally agreed performance targets? :	Yes	
BREEAM Advisory Professional (Concept Design) :	Yes	
BREEAM Advisory Professional (Developed Design) :	Yes	
Credits awarded : 4		

Man 02 Life cycle cost and service life planning

To promote the business case for sustainable buildings and to deliver whole life value by encouraging the use of life cycle costing to improve design, specification, through-life maintenance and operation.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Elemental LCC :	No
Component level LCC options appraisal :	No
Capital cost reporting :	Yes
Capital cost of the project :	10 £k/m ²

Credits awarded : 1

Man 03 Responsible construction practices

To recognise and encourage construction sites which are managed in an environmentally and socially considerate, responsible and accountable manner.

ASSESSMENT CRITERIA	
Prerequisite: Are all timber and timber-based products used during the construction process of the project 'legally harvested and traded timber'? : Environmental management :	Yes
Prerequisite: Have the client and the contractor formally agreed performance targets? :	Yes
BREEAM Advisory Professional (site) :	Yes
Responsible construction management :	2
Monitoring of construction site impacts :	Yes

Utility consumption :	Yes
Transport of construction materials and waste :	Yes
Exemplary level criteria - Responsible construction management :	Yes
KEY PERFORMANCE INDICATORS: CONSTRUCTION SITE ENERGY USE	
Energy consumption (total) - site processes :	100 kWh
Energy consumption (intensity) - site processes :	100 kWh/project value
KEY PERFORMANCE INDICATORS: CONSTRUCTION SITE GREENHOUSE GAS EMISSIONS	
Process greenhouse gas emissions (total) - site processes :	100 KgCO ₂ eq
Carbon dioxide emissions (intensity) - site processes :	100 KgCO ₂ eq/project value

Credits awarded : 6 Exemplary credits awarded : 1

Man 04 Commissioning and handover

To encourage a properly planned handover and commissioning process that reflects the needs of the building occupants.

Site : Gladstone Road

ASSESSMENT CRITERIA		
Commissioning testing schedule and responsibilities :	Yes	
Commissioning - design and preparation :	Yes	
Testing and inspecting building fabric :	No	
Handover - have a technical and a non-technical building user guide been developed prior to handover? : Yes		
Handover - have a technical and a non-technical training schedule been prepared around handover? :	Yes	

Credits awarded : 3

Man 05 Aftercare

To ensure the building operates in accordance with the design intent and operational demands, through providing aftercare to the building owner and occupants during the first year of occupation.

ASSESSMENT CRITERIA	
Is this a speculative development? :	No
Aftercare support :	Yes
Commissioning - implementation :	Yes
Post occupancy evaluation :	Yes
The client or building occupier commits funds to pay for the POE in advance. :	Yes
Credits awarded : 3	

Hea 01 Visual comfort

To encourage best practice in visual performance and comfort by ensuring daylighting, artificial lighting and occupant controls are considered.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Control of glare from sunlight :	Yes
Daylighting (building type dependent) :	2
View Out :	Yes
Internal and external lighting levels, zoning and controls :	Yes
Exemplary level criteria - Daylighting :	No
Exemplary level criteria- Internal and external lighting levels, zoning and control :	No
Credits awarded : 5	

Hea 02 Indoor air quality

To encourage and support healthy internal environments with good indoor air quality.

Site : Gladstone Road

ASSESSME	NT CRI	TERIA

Pre requisite: Indoor air quality (IAQ) plan :	Yes
Ventilation :	Yes
Emissions from building products :	2
Post-construction indoor air quality measurement :	Yes
Exemplary level criteria- Emissions from building products :	Yes
KEY PERFORMANCE INDICATORS	
Formaldehyde concentration :	10 μg/m ³
Total volatile organic compound (TVOC) concentration :	10 μg/m ³
Credits awarded : 4 Exemplary credits awarded : 1	

Hea 04 Thermal comfort

To ensure the building is capable of providing an appropriate level of thermal comfort.

ASSESSMENT CRITERIA	
Thermal modelling :	Yes
Design for future thermal comfort :	Yes

Thermal zoning and controls :

KEY PERFORMANCE INDICATORS

PMV and PPD Indices :

Credits awarded : 3

Hea 05 Acoustic performance

To ensure the building is capable of providing an appropriate acoustic environment to provide comfort for building users.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Sound insulation :	1
Indoor ambient noise level :	No
Room acoustics :	No
Credits awarded : 1	

Hea 06 Security

To encourage the planning and implementation of effective measures that provide an appropriate level of security to the building and site.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Security of site and building :	Yes
Exemplary level criteria :	No
Credits awarded : 1	

Hea 07 Safe and Healthy Surroundings

To encourage the provision of safe access around the site and outdoor space that enhances the wellbeing of building users. .

ASSESSMENT CRITERIA	
Safe Access :	Yes
Outside Space :	Yes
Credits awarded : 2	

Ene 01 Reduction of energy use and carbon emissions

To minimise operational energy demand, primary energy consumption and CO2 emissions.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Country :	England
Energy Production by Technology :	
Energy & CO ₂ Emissions Summary :	
Actual building energy demand :	80 MJ/m ² yr
Notional building energy demand :	100 MJ/m ² yr
Actual building primary energy consumption :	80 kWh/m ² yr
Notional building primary energy consumption :	100 kWh/m ² yr
Actual building CO ₂ -eq emissions (BER) :	16 KgCO ₂ -eq/m ² yr
Notional building CO ₂ -eq emissions (TER) :	20 KgCO ₂ -eq/m ² yr
Does this building contain areas that require a SAP assessment? :	No
BUILDING SCORE	
Total BREEAM credits achieved :	4.0
Heating and cooling demand energy performance ratio (EPRdem) :	0.154
Primary consumption energy performance ratio (EPRpc) :	0.133
CO ₂ -eq energy performance ratio (EPRco2-eq) :	0.142
Overall building energy performance ratio (EPRnc) :	0.429
% improvement BER/TER :	20.0 %
ASSESSMENT CRITERIA (EXEMPLARY CREDITS)	
Zero net CO ₂ -eq emissions :	No
ASSESSMENT CRITERIA	
Has a design workshop focusing on operational energy performance been carried out? :	No
ASSESSMENT CRITERIA (EXEMPLARY CREDITS)	
Maximum credits achieved in Ene 02 Energy monitoring? :	Yes
The client or building occupier commits funds to pay for the post-occupancy stage? :	No
The energy model is submitted to BRE and retained by the building owner? :	No
Credits awarded : 4	

Ene 02 Energy monitoring

To encourage the installation of energy sub-metering that facilitates the monitoring of operational energy consumption. To enable managers and consultants post-handover to compare actual performance with targets in order to inform ongoing management and help in reducing the performance gap.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Sub-metering of end use categories :	Yes
Sub-metering of high energy load and tenancy areas :	Yes
Credits awarded : 2	

Ene 03 External lighting

To reduce energy consumption through the specification of energy efficient light fittings for external areas of the development.

Site : Gladstone Road

ASSESSMENT CRITERIA	
External lighting has been designed out? :	No
Is external lighting specified in accordance with the relevant criteria? :	Yes
Credits awarded : 1	

Ene 04 Low carbon design

To encourage the adoption of design measures, which reduce building energy consumption and associated carbon emissions and minimise reliance on active building services systems.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Has the first credit within Hea 04 been achieved? :	Yes
Passive design analysis :	Yes
Free cooling :	No
Low and zero carbon technologies :	Yes

KPI

Total on-site and/or near-site LZC energy generation :

Expected energy demand and CO_2 -eq emissions reduction resulting from passive design measures :

Expected energy demand and $\rm CO_2$ -eq emissions reduction resulting from passive design measures as a

percentage :

Expected reduction in CO₂-eq emissions resulting from the LZC technologies :

Expected reduction in CO_2 -eq emissions resulting from the LZC technologies as a percentage :

Credits awarded : 2

Ene 05 Energy efficient cold storage

To encourage the installation of energy efficient refrigeration systems, in order to reduce operational greenhouse gas emissions resulting from the system's energy use.

Site : Gladstone Road

ASSESSMENT CRITERIA - N/A

Ene 06 Energy efficient transportation systems

To encourage the specification of energy efficient transport systems within buildings.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Energy consumption :	Yes
Energy efficient features - Lifts :	Yes
Credits awarded : 2	

Ene 07 Energy efficient laboratory systems

To encourage laboratory areas that are designed to minimise their operational energy consumptionand associated CO2 emission

Site : Gladstone Road

ASSESSMENT CRITERIA - N/A

Ene 08 Energy efficient equipment

To encourage installation of energy efficient equipment to ensure optimum performance and energy savings in operation

Site : Gladstone Road

ASSESSMENT CRITERIA

Swimming pool present? :	No
Laundry facilities with commercial-sized appliances present? :	No
Data centre present? :	Yes
Major impact? :	No
IT-intensive operating areas present? :	No
Domestic scale appliances (individual and communal facilities) present? :	Yes
Major impact? :	Yes
Healthcare equipment present? :	No
Kitchen and catering facilities present? :	Yes
Major impact? :	No
Other contributors :	
Significant majority contributors BREEAM compliant :	Yes
Credits awarded : 2	

Tra 01 Transport assessment and travel plan

To reward awareness of existing local transport and identify improvements to make it more sustainable.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Travel plan :	Yes
Credits awarded : 2	

Tra 02 Sustainable transport measures

To maximise the potential for local public, private and active transport through provision of sustainable transport measures appropriate to the site.

ASSESSMENT CRITERIA	
Prerequisite :	Yes
Location type (based on existing AI) :	AI <25
Number of points achieved overall :	4
Credits awarded : 4	

Wat 01 Water consumption

To reduce the consumption of potable water for sanitary use in new buildings through the use of water efficient components and water recycling systems.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Please select the calculation procedure used :	Alternative approach
Credits awarded :	3
Exemplary performance :	No
KEY PERFORMANCE INDICATORS	
Alternative approach data: :	
Overall microcomponent performance level achieved :	Level 3
Credits awarded : 3	

Wat 02 Water monitoring

To reduce the consumption of potable water in new buildings through the effective management and monitoring of water consumption.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Water meter on the mains water supply to each building :	Yes
Sub-metering/monitoring equipment on supply to plant/building areas :	Yes
Pulsed output or other open protocol communication output and BMS connection :	Yes
The water monitoring strategy used enables the identification of all water consumption for sanitary uses as assessed under Wat 01 (L/person/day) :	No
Credits awarded : 1	

Wat 03 Water leak detection

To reduce the consumption of potable water in new buildings through minimising wastage due to water leaks.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Leak detection system :	Yes
Are WC facilities only provided within the residential areas of a long-term residential accommodation? :	No
Flow control devices :	Yes
Credits awarded : 2	

Wat 04 Water efficient equipment

To reduce water consumption for uses not assessed under Wat 01 by encouraging specification of water efficient equipment.

Site : Gladstone Road

ASSESSMENT CRITERIA - N/A

Mat 01 Life cycle impacts

To reduce the burden on the environment from construction products by recognising and encouraging measures to optimise construction product consumption efficiency and the selection of products with a low environmental impact (including embodied carbon), over the life cycle of the building.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Total Mat 01 credits achieved - taken from the Mat 01/02 Results Submission Tool :	0
Total Exemplary credits achieved - taken from the Mat 01/02 Results Submission Tool :	0

Credits awarded : 0

Mat 02 Environmental impacts from construction products

To encourage availability of robust and comparable data on the impacts of construction products through the provision of EPD.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Mat 02 credit achieved - Taken from the Mat 01/02 Results Submission Tool. :	0

Credits awarded : 0

Mat 03 Responsible sourcing

To facilitate the selection of products that involve lower levels of negative environmental, economic and social impact across their supply chain including extraction, processing and manufacture.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Prerequisite: All timber and timber based products are 'Legally harvested and traded timber' :	Yes
Has the enabling sustainable procurement credit been achieved? :	Yes
Mat 03 minimum scope level :	plus Core building services

Credits awarded : 3

Mat 05 Designing for durability and resilience

To reduce the need to repair and replace materials resulting from damage to exposed elements of the building and landscape.

Site : Gladstone Road

ASSESSMENT CRITERIA

Protecting vulnerable parts of the building from damage and exposed parts of the building from material Yes degradation :

Credits awarded : 1

Mat 06 Material efficiency

To avoid unnecessary materials use arising from over specification without compromising structural stability, durability or the service life of the building.

Site : Gladstone Road

ASSESSMENT CRITERIA

Material optimisation measures investigated and implemented at all relevant stages :

Yes

Credits awarded : 1

Wst 01 Construction waste management

To reduce construction waste by encouraging reuse, recovery and best practice waste management practices to minimise waste going to landfill.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Is demolition occurring under the developer's ownership for the purpose of enabling the assessed development? :	Yes
Pre-demolition audit :	Yes
Compliant Resource Management Plan :	Yes
Have waste materials been sorted into separate key waste groups? :	Yes
Exemplary level criteria :	No
KPI	
Measure/units for the data being reported :	m ³
Non-hazardous construction waste (excluding demolition/excavation) - fill in to award 'Construction	7.5 m3/100m2
resource efficiency' credits : Total non-hazardous construction waste generated :	100 m3
Non-hazardous non-demolition construction waste diverted from landfill - fill in to award diversion from landfill credit :	95 %
Total non-hazardous non-demolition construction waste diverted from landfill :	100 m3
Non-hazardous demolition waste diverted from landfill - fill in to award diversion from landfill credit :	90 %
Total non-hazardous demolition waste generated :	100 m3
Total non-hazardous demolition waste to disposal :	100 m3
Non-hazardous excavation waste diverted from landfill - fill in to award credit :	100 %
Material for reuse :	
Material for recycling :	
Material for energy recovery :	
Hazardous waste to disposal :	
Credits awarded : 4	

Wst 02 Use of recycled and sustainably sourced aggregates

To encourage the use of more sustainably sourced aggregates, encourage reuse where appropriate and avoid waste and pollution arising from disposal of demolition and other forms of waste.

ASSESSMENT CRITERIA	
Is demolition occurring under the developer's ownership for the purpose of enabling the assessed development? :	Yes
Pre-requisite: pre-demolition audit :	Yes
Projects Sustainable Aggregate points :	0

KPI	
Total quantity of aggregate :	100 tonnes
% of high - grade aggregate that is recycled/ secondary aggregate by application :	0 %

Credits awarded : 0

Wst 03 Operational waste

To encourage the recycling of operational waste through the provision of dedicated storage facilities and space.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Compliant recycling and non-recyclable waste storage allocated :	Yes
Static waste compactor(s) or baler(s) :	Yes
Vessel(s) for composting suitable organic waste and water outlet :	Yes
Multi-residential buildings with self-contained dwellings or bedsits only criteria achieved :	Yes
Multi-residential buildings with with individual bedrooms and communal facilities only criteria achieved	I: Yes

Credits awarded : 1

Wst 04 Speculative finishes (Offices only)

To minimise the wastage associated with the installation of floor and ceiling finishes in lettable areas in speculative buildings where tenants have not been involved in their selection.

Site : Gladstone Road

ASSESSMENT CRITERIA - N/A

Wst 05 Adaptation to climate change

To minimise the future need of carrying out works to adapt the building to take account of more extreme weather changes resulting from climate change and changing weather patterns.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Resilience of structure, fabric, building services and renewables installation :	Yes
Exemplary level - responding to climate change :	No
Credits awarded : 1	

Wst 06 Design for disassembly and adaptability

To avoid unnecessary materials use, cost and disruption arising from the need for future adaptation works as a result of changing functional demands and to maximise the ability to reclaim and reuse materials at final demolition in line with the principles of a circular economy.

Site : Gladstone Road

ASSESSMENT CRITERIA

Design for disassembly and functional adaptability - recommendations :

CONSOLUX

Disassembly and functional adaptability - implementation :

Credits awarded : 2

Yes

LE 01 Site selection

To encourage the use of previously occupied or contaminated land and avoid land which has not been previously disturbed.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Percentage of proposed development's footprint on previously occupied land: :	100 %
Contaminated land :	Yes
Credits awarded : 2	

LE 02 Ecological risks and opportunities

To determine the existing ecological value associated with the site and surrounding areas, and the risks and opportunities for ecological protection and enhancement.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Assessment route selection :	Comprehensive
Prerequisite - Statutory obligations :	Yes
Survey and Evaluation :	Yes
Determining ecological outcomes :	Yes
Exemplary level - Wider site sustainability :	No

Credits awarded : 2

LE 03 Managing impacts on ecology

To avoid, or limit as far as possible, negative ecological impacts associated with the site and surrounding areas resulting from the project.

Site : Gladstone Road

ASSESSMENT CRITERIA	
Assessment route :	Comprehensive
Prerequisite - Ecological risks and opportunities :	Yes
Planning and measures on-site :	Yes
Managing negative impacts :	2
Credits awarded : 3	

LE 04 Ecological change and enhancement

To enhance ecological value of the area associated with the site in support of local, regional and national priorities.

ASSESSMENT CRITERIA	
Assessment route :	Comprehensive
LE03 'Managing negative impacts' criteria achieved :	Yes
Prerequisite - Managing negative impacts on ecology :	Yes
Ecological enhancement (Comprehensive route only) :	Yes
Change and enhancement of ecology (Comprehensive route only) :	2
Credits awarded : 3	

LE 05 Long term ecology management and maintenance

To secure ongoing monitoring, management and maintenance of the site and its habitats and ecological features, to ensure intended outcomes are realised for the long term.

ASSESSMENT CRITERIA	
Assessment route :	Comprehensive
LE03 'Managing negative impacts' criteria achieved :	Yes
At least one credit achieved in LE 04 :	Yes
Prerequisite - Statutory obligations, planning and site implementation :	Yes
Management and maintenance throughout the project :	Yes
Landscape and ecology management plan :	Yes
Credits awarded : 2	

Pol 01 Impact of refrigerants

To reduce the level of greenhouse gas emissions arising from the leakage of refrigerants from building systems.

Site : Gladstone Road

ASSESSMENT CRITERIA

Refrigerant containing systems installed in the assessed building? :

Credits awarded : 3

Pol 02 Local air quality

To contribute to a reduction in local air pollution through the use of low emission combustion appliances in the building.

Site : Gladstone Road

ASSESSMENT CRITERIA

Is the project required to connect to a District Heating system, and it supplies all heating and hot water demands to the building? : How many credits have been achieved? : 2

Credits awarded : 2

Pol 03 Flood risk management and reducing surface water run-off

To avoid, reduce and delay the discharge of rainfall to public sewers and watercourses, thereby minimising the risk and impact of localised flooding on and off-site, watercourse pollution and other environmental damage.

Site : Gladstone Road

ASSESSMENT CRITERIA

Acceleration of the tax	
Prerequisite: Has an appropriate consultant demonstrated and confirmed the development's compliance with all sought credits? :	Yes
Has a site-specific flood risk assessment been conducted? :	Yes
Annual probability of flooding :	Low
Has the pre-requisite for the Surface Water Run-Off credits been achieved? :	Yes
Has the Surface Water Run-Off - Rate credit been achieved? :	Yes
Has the Surface Water Run-Off - Volume credit been achieved? :	Yes
Minimising watercourse pollution :	No

Credits awarded : 4

Pol 04 Reduction of Night Time Light Pollution

To ensure that external lighting is concentrated in the appropriate areas and that upward lighting is minimised, reducing unnecessary light pollution, energy consumption and nuisance to neighbouring properties.

Site : Gladstone Road

ASSESSMENT CRITERIA

No

External lighting has been designed out? :

Does external lighting meet all relevant criteria? :

Yes

No

CONSOLUX

Credits awarded : 1

Pol 05 Noise attenuation

To reduce the likelihood of noise arising from fixed installations on the new development affecting nearby noise-sensitive buildings.

ASSESSMENT CRITERIA	
Noise-sensitive areas/buildings within 800m radius of the development :	Yes
Is the site compliant with all relevant criteria? :	Yes
Credits awarded : 1	

Inn 01 Innovation

To support innovation within the construction industry through the recognition of sustainability related benefits which are not rewarded by standard BREEAM issues.

Site : Gladstone Road

ASSESSMENT CRITERIA

Number of 'approved' innovation credits achieved? :

Credits awarded : 0

0
